¶2. Both COL Natthasit and COL Bunyawat confirmed the NVDs are being used for the purpose stated on the license. The officers represent the purchasing and distribution agency for the NVDs, not the end use units.

The devices in Shipment one were shipped to the RTA Special Warfare Command in Lopburi as follows:

20263 to Special Warfare Unit 4, Battalion 1

All 82 NVDs in shipments two, three and four were shipped to the 1st Special Warfare Regiment at Lopburi.

¶3. Both COL Natthasit and COL Bunyawat acknowledged, understood and are abiding by the licenses' limitations and provisos. They explained that they understand the End-User Statement and USML regulations. They acknowledged their obligation to report in writing to PM/DDTC any theft, loss or

unauthorized access to the NVDs within 30 days but explained that they no longer have physical custody of the devices. They also explained that the RTA has internal investigative procedures as well. They acknowledged their responsibility to perform monthly 100 per cent physical count inventories and quarterly 100 percent serial number inventories. They explained that the RTA has additional internal procedures requiring weekly, monthly and quarterly cross checks conducted periodically by the Army Inspector General. They confirmed that the NVDs are secured in a controlled-access, monitored, double barrier protection facility. POL FSN was unable to make a spot check of NVDs image intensifier tubes since the devices are deployed in the field. Post requests guidance on whether PM/DTCC wishes POL/FSN travel to conduct an actual count and spot check at the Special Warfare Command in Lopburi.
